This article helps you setup shipping costs for individual product and if you are selling a bulky / heavy / oversize item that needs to be shipped in a separate parcel, then you can enable the "Apply per box" setting.

### A. Setup shipping to individual product(s)

Refer to this KB article,

- Enter **Weight value** for the heavy / bulky item in EditProduct dialog.

The screenshot shows the 'EditProduct' dialog box. At the top, there are two checkboxes: 'Product visible' (checked) and 'Don't show 'Add to Basket' button' (unchecked). Below this, there are four input fields: 'Product title' (containing 'Bulky Test Product 40'), 'Price' (containing 'A\$ 125.00'), 'Promote' (a dropdown menu), and 'SKU / Cat. No.' (containing 'test-pr40'). To the right of the 'SKU / Cat. No.' field is a 'Weight' field, which is highlighted with a red box. The 'Weight' field contains the value '20.000' and a unit selector 'kg'.

B. If your heavy/bulky item needs to be sent as a separate parcel, you can also use "**Apply per box**" setting in the shipping charges dialog

- Open your shop in ShopFactory
- Click **Central** dropdown -> Shipping Charges
- Click Next and then select the shipping method
- Tick "**Apply per box**" and enter the maximum weight for that heavy / oversize item i.e. 20kg/lbs

In the 'Select a region' Window select a region belonging to a shipping method.
