Changing Currency Code for a specific country in ShopFactory

Merliza N. - 2022-04-05 - Miscellaneous Settings

If the official currency code in your country has changed, contact **ShopFactory Support** to have it changed in a future software release.

To change it immediately in your shop, follow the steps below:

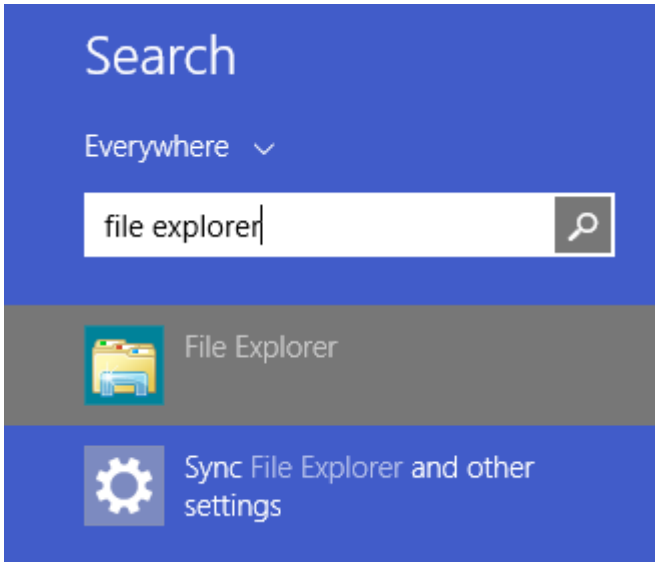

An example used in this article is ***NKr*** currency code to ***NOK***.

1. Open ***Windows File Explorer***.

- You can do this by pressing ***Win+E*** on your keyboard to launch File Explorer immediately.

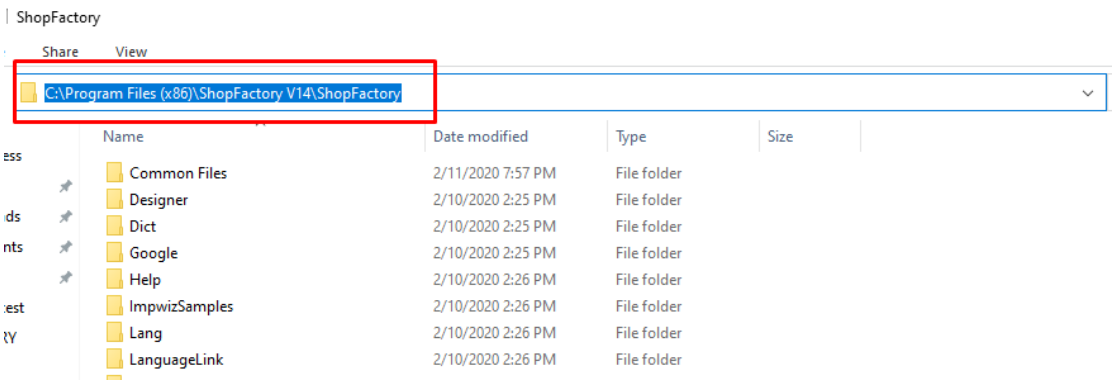

- Or you can use ***Windows Search***

On the Windows Start screen type the words "*file explorer*" and, when the search results are displayed, press Enter on your keyboard or click or tap the File Explorer result.

2. At the "Address: " bar, enter:

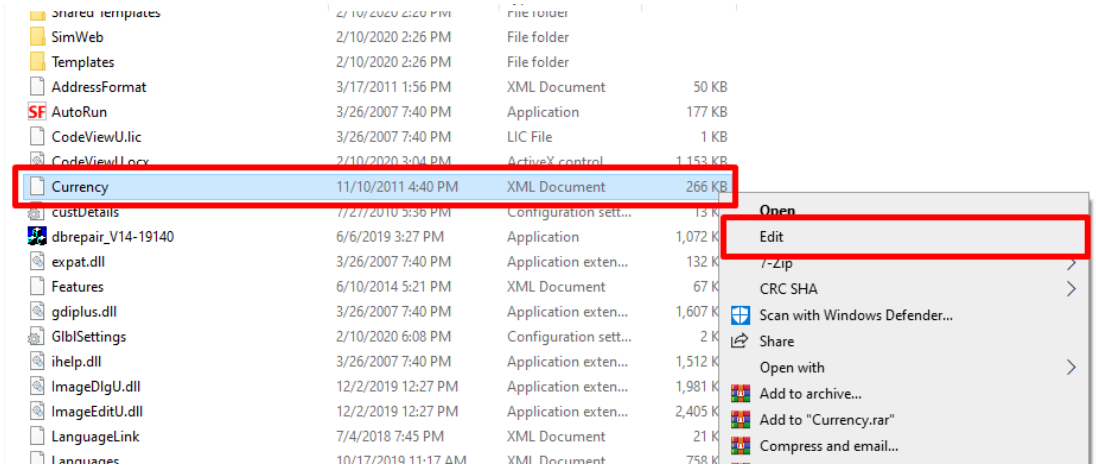

C:\Program Files (x86)\ShopFactory V14\ShopFactory

3. Press Enter Key on your keyboard.

4. Locate the file called "**Currency.xml**" file.

5. Right-click on the ***Currency.xml*** file and from the shortcut menu, select '***Edit***'.

6. The Currency.xml file will open in **Notepad** as plain text.

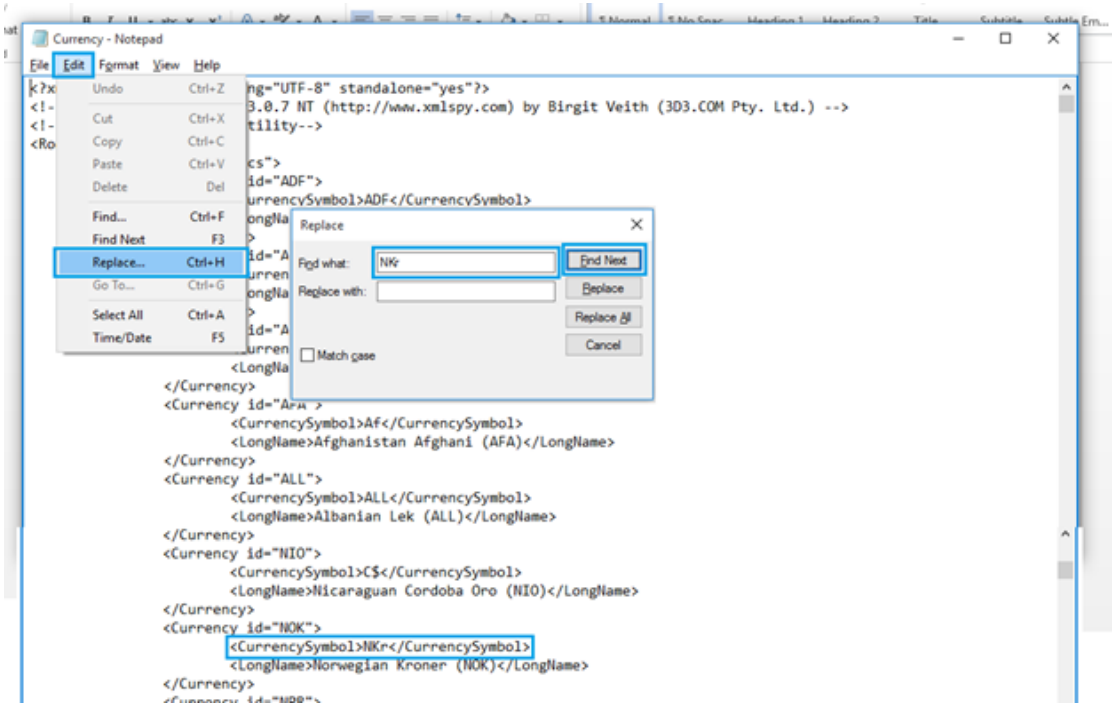

7. Click inside the text area in Notepad and then press *CTRL+Home* simultaneously so you are able to start from the top-most part of the text.

- Click 'Edit' menu » select 'Replace'

As an example, we are changing ***NKr*** to ***NOK***.

- You will see the 'Find and Replace' dialog box, type *NKr* in the Find what: box

- Type *NOK* within the Replace with: box.

- Click 'Find Next' button and it will highlight NKr.

- Click 'Replace' button to replace it.

- Continue clicking 'Find Next' button and 'Replace' (you will do this approximately 14 times)

- Click Save

8. Open your shop in ShopFactory.

9. Enable 'Rebuild All' by selecting ***Settings*** menu

10. Save and Preview your shop in Chrome or MS Edge external browser.

11. Publish your shop again.
