Customizing Search Results page - change the highlighting color and number of search results

Merliza N. - 2021-12-08 - Global Settings

A) Increasing the Search Results value?

To change the search results value from 150, you would need to edit "**search.php**" file in the ShopFactory installation **Common Files\PHPSearch** folder and change the DEFINE ('MAXIMUM_RESULTS', 150); line to another value.

- Make sure ShopFactory is not currently running. Close ShopFactory.

- Open Windows Explorer

- Navigate to this path

C:\Program Files\ShopFactory V14\ShopFactory\Common Files\phpsearch

- Right click on the ***search.php*** file and select "Open With... -> Notepad"

- Find this line:

DEFINE('MAXIMUM_RESULTS', 150);

- Change the numerical value to whatever you like.

- Save the file.

- Open your shop in ShopFactory, enable Rebuild All from the Settings menu.

- Save and preview shop.

- Go back to normal mode and then untick Rebuild All from the Settings

menu.

B) Changing the highlighting of search words to a different colour in the Search results page:

add this line to the **<project folder>\Runtime\contents\styles\website.css** file:

.SearchStringFound {background-color:green!important;}

Where, green can be changed to whatever colour you want, *i.e. black*
