Handling out of stock for some products. If it takes time to re-stock, I want to take these products off my website. Is there an easy way to do this?

Merliza N. - 2021-11-16 - Pages and Products

A: Yes, you are able to hide products in your shop or simply turn off buying for that product

Option 1 - Make Product Invisible

1. In ShopFactory editor, click on the page that contains the product that you would like to disable from the left-tree menu.
2. Select the product and click EDIT PRODUCT
3. This will open the Product Properties dialog. At the bottom right hand side of this dialog, you will find check box titled '***Visible***' with a tick inside. Click on the tick to uncheck this option and make the product invisible.
4. Once you have new stock for this product, follow the steps again and put a tick in the check box 'Visible' to switch the product back to being visible.

Option 2 - Enable "Don't allow buying" option (This removes 'Add to Basket' button in product page)

1. In ShopFactory editor, click on the page that contains the product that you would like to disable from the left-tree menu.
2. Select the product and click EDIT PRODUCT
3. This will open the Product Properties dialog. At the bottom left hand side of this dialog, you will find a check box titled '***Don't show Add to Basket Button***'. Click on it to add a tick and check this option. They will not be able to order this product.
4. Once you have new stock for this product, follow the steps again and untick in the check box 'Don't show Add to Basket button' to allow buying again.

- Save and publish your shop so the changes are uploaded online.
