How do I accept payments using First Data Global Gateway e4 Hosted Payment page?

Merliza N. - 2021-12-08 - Payment Settings

To setup First Data Global Gateway e4 payment method, load your website in Shop Factory Editor and follow these steps:

- 1. Click on the "Central dropdown" (formerly "Properties" button).
- 2. Select "Payment methods accepted" on the drop-down menu.
- 3. Ensure that the "Country" dropdown menu has "Show All" selected.

5. Click "Next"

6. In a separate window, log into your Global Gateway e4 Real-time Payment Manager Account to retrieve your Merchant details: Payment Page ID and Transaction Key. For **e4 API**, you will need the Gateway ID, Password, Key ID, and HMAC Key from the FirstData terminal. Please carefully copy these details as any trailing space will cause an issue. More importantly, please ensure that the "**Request Content Type**" is set to **JSON** (and not SOAP) - click update to save.

- Select the "Payment Pages" tab. If you have already created a Payment Page, copy your **Payment Page ID** and paste into the "**Username**" Field in ShopFactory. You can find your Payment Page ID in the first column of the grey table or when you open the page you'll find it at the top next to "Payment Page Settings" (HCO-FDC-D-577 in the screen shot below).
- Next choose the Payment Page's **Security Tab** and copy the **Transaction Key**. Paste the Transaction Key in to the "**Transaction Key**" field in ShopFactory as seen below.

1. General					
2. Payment Types	Security Settings				
3. Receipt Page	Transaction and Response Keys can be generated in this section according to the Encryption Type selected				
4. Receipt Emails	Note: Generating new keys will break existing page links. Please use caution when using this function.				
5. Recurring	Wiew help for this section in the knowledge base				
6. Appearance					
7. Security	HMAC Calculation				
8. Hash Calculator	Encryption Type MD5 SHA-1				
	Note: The default encryption algorithm is MD5. SHA-1 is only advised for custom requirements. Transaction Key				
	Transaction Key AB12C34DefGhl5jK6L7M				
	Note: The Transaction Key is used in the payment page linking/request.				

7. Go back to your ShopFactory-payment methods accepted editor

8. Enter your **"First Data Global Gateway e4" or "First Data Global Gateway e4 API"** Account details.
