## How do I change the weight unit in my shop?

Merliza N. - 2021-03-02 - [Miscellaneous Settings](#)

In ShopFactory, the weight for a product is set to kilos (Kgs). For example, if you want to specify the product weight in pounds (lbs) - you can either set your weight unit in Kilograms, Grams, Pounds, or Ounces. This can be changed in Global settings and applied to the current shop.

1. Click the Settings button in the top toolbar -> select Global Settings from the drop-down menu.
2. Select "Settings for this website" (to change for only this website) -> click on **Miscellaneous**
3. Locate the '**Specify weight in:**' section with a drop-down box -> select the weight -> click OK

The screenshot shows the 'Global Settings' dialog box. On the left is a tree view with 'Global Settings' expanded, showing 'New Website' and 'Settings for this Website'. Under 'Settings for this Website', 'Miscellaneous' is selected. The main area contains various settings. The 'Specify weight in:' dropdown is highlighted with a yellow box and has a red circle and arrow pointing to it. The dropdown menu is open, showing the following options: kg, oz, st, lbs, gms, and g. The 'lbs' option is currently selected. At the bottom of the dialog are 'OK', 'Cancel', and 'Help' buttons.

4. Select **Settings** menu - enable 'Rebuild all' to rebuild your shop with the new settings
5. Save and publish your shop.
