How do I convert my version 14 ShopFactory or older version shop to the latest ShopFactory 15?

ShopFactory Support - 2026-04-02 - Getting Started

It is very easy to convert your shop to ShopFactory 15. You can follow the steps below.

- We always recommend making a backup of your current shop first before installing a new version.

- Download and install the ShopFactory 15 software via this link:
https://www.shopfactory.com/contents/en-us/d105.html

- Start Shopfactory 15 and open your shop from version 14 (or an older version of ShopFactory).

- ShopFactory 15 will automatically make a copy of this and open it in version 15. Your original shop from the previous version will therefore remain intact.

- Optional: Go to 'Settings' and click on 'Rebuild all' and click on 'Preview in external browser' -> place a test order in your shop to test if the checkout works properly. Go back to 'Normal' view and turn off 'Rebuild all' by clicking on it again in the Settings menu.

- Publish your website on the internet.
