

How do I correct my Shop URL / website address in Google XML feed?

Merliza N. - 2021-12-08 - Search Engine Optimization (SEO)

Make sure you have entered the complete website address / correct Publish URL in the Publish SETUP box and Contact Details form.

Note: If you have purchased your own SSL certificate, please enter *https://* instead of *http://* in the homepage and Publish URL fields.

- Open your shop in ShopFactory.

- Click on Publish -> Publish your website on the Net -> click **SETUP** button

- Ensure you have entered the correct PUBLISH URL as shown in the screenshot, i.e.

http://test.shopfactory.com/

The screenshot shows a 'Setup' dialog box with the following fields and options:

- Internet** (selected):
 - Remote Host:
 - Protocol:
 - Encryption:
 - User Name:
 - Password:
 - Base Directory:
 - Passive
 - Use PHP search Automatic PHP detection
 - Timeout:
- My Computer** (unselected):
 - Directory:
 - Publish URL: (highlighted with a red box and a red arrow)
 - Options: Rename Website home page to

Buttons at the bottom:

- Click OK

- Click Close to exit the publish dialog.
- Click on the **Central** dropdown button (formerly known as *Properties*) -> **Contact Details**
- Enter the correct URL at the **HOME PAGE** field, i.e. *http://test.shopfactory.com/*

The screenshot shows the 'Page Properties Wizard - Contact' dialog box. The 'Contact details' tab is selected and highlighted with a red box. The 'Home page' field is also highlighted with a red box and has a red arrow pointing to it from the left. The form contains various fields for contact information, including Country (United States), User profile (SF new build_3d3.com), Name (SF new build), Company name (3d3.com), Address (test), Suburb (testing), City (test101), State (California), County (Los Angeles), and ZIP (90210). There are also fields for Phone, Fax, and Email, as well as Company number, Tax number, and Custom fields.

- Click OK
- Save and preview shop in external browser.
- Go back to Normal mode and publish your shop again.

IMPORTANT: After publishing your shop, you will need to generate the Google Base XML file again in Marketeer and then submit the new XML file to Google to fix the problem.

Additional info:

Note that you can also submit the "*sitemap.xml*" file to Google to expedite the indexing of your shop pages:

Submit the *sitemap.xml* file found at *ShopFactory V14 Websites\<shop folder>\Runtime*
