How to set up decreasing shipping costs or free if customer Spends over a certain amount?

Elenor A. - 2021-12-08 - Shipping and Taxes

I want to setup shipping so that the more a customer spends in the shop the less they have to pay for Shipping.

To achieve this, you would most likely want to setup shipping costs based on "*Percentage of price*", by "*Number of Products*" or by "*Price*"

In this example we will setup "Calculate Shipping charges by Price" - initial shipping cost is $10, but if you spend $50, the shipping cost is reduced to half price and if you spend over $200 then shipping is free. This will apply to local region.

1. Click on ***Central*** dropdown button => **Shipping Charges**

2. Choose "**Enter my own shipping Charges**" and select the shipping method this pricing will apply to.

For the purpose of this example I have created a Shipping method called *Standard*.

3. As soon as you enable a shipping method, you will be asked to "Setup the regions you want to ship to", i.e. ***Local Region*** and/or ***Rest of the world*** (outside merchant country)

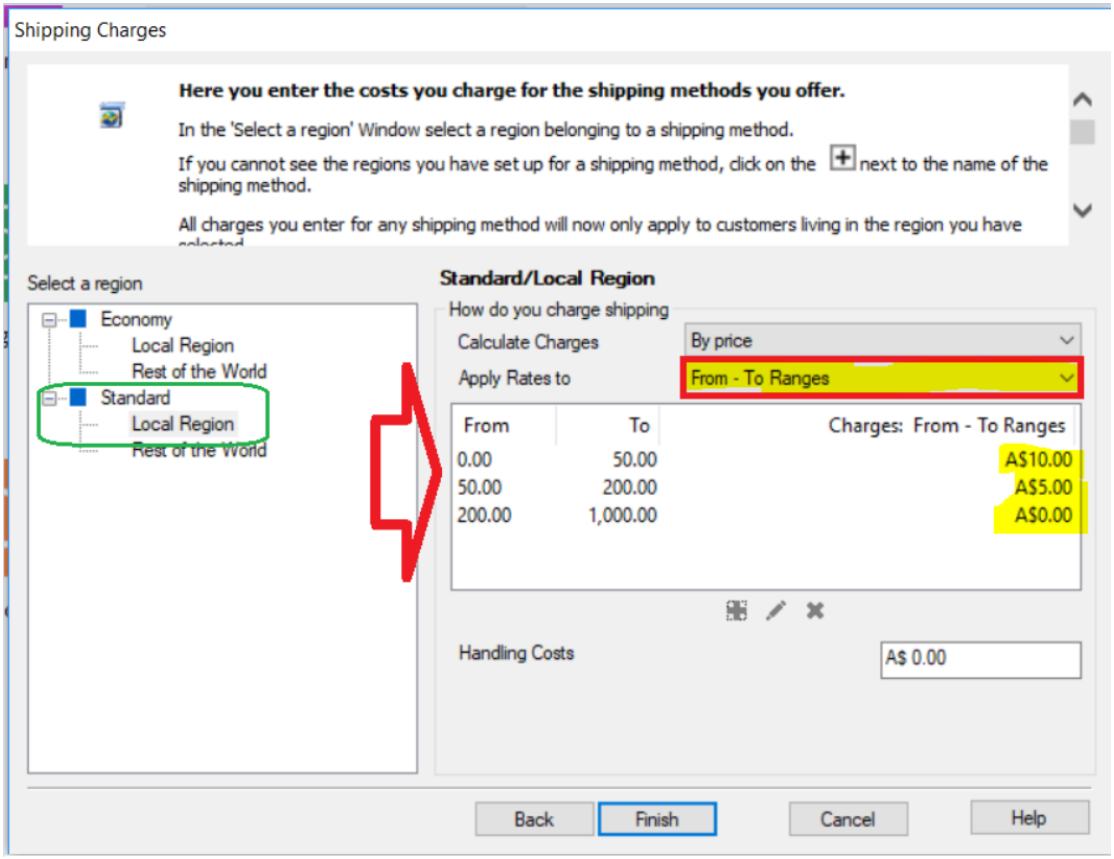

- Select the countries you want to ship the products into and click OK

- If you are prompted, "Will this method be available for all products?" - click Yes / No.

4. Click NEXT

5. At the "**Apply Rates to:**" – select "**From - To Ranges**"

Now you set up the charges in the window below

Then choose By Price in Calculate charges

Choose From - To Ranges in Apply Rates to

Click on the + button to add each range.

Range 1: From 0 to $50 shipping is $10 - (if you spend less than $50 then shipping cost is $10)

Range 2: From $50 to $250 shipping is 1/2 price - that is $5.00
(so if you spend between $50 and less than $250, you only pay $5.00 for shipping)

Range 3: From $250 and over you get free shipping ($0.00)
I added From $250 to $1000 (you can make it some large amount), shipping is $0.00.
This means that if you spend $250 or more and up to $1000 shipping is zero

6. Click **Finish** to submit the charges.

7. Save and publish your shop.

Note: You can also set this up to use "buy more products" pay less for shipping.
In this case you would choose the option "*by Number of Products*"
