Language Link: Translate Content - translating your pages and products, page link info, navigation description and images

Merliza N. - 2021-08-29 - [Apps & ShopFactory Cloud](#)

Selling in multiple languages easier than ever

A completely reworked Language Link in the current ShopFactory release makes translating and managing websites in multiple languages easier than ever.

We have fully integrated this powerful translation tool with the new *drag and drop* content block editor. So now you can use and translate content blocks in any language. A nifty little function even allows you to copy and drag blocks from the original language to the translation language for easy translation of newly added blocks in the original language.

Check out the video to see, how that works.

A vastly improved user interface brings Language Link up to the standards of ShopFactory. It makes accessing functions easier, and allows you for example to set up which pages and products should be available in which language.

If you have enabled other languages using the "navigation languages"; you must also set these languages as translation languages to activate your pages and products in other languages.

1) Then go to the **Language** toolbar, click the "*Copy base language value*" button to make the page and products visible for translation to other languages. This button can be On or Off. A border around it indicates it is ON.

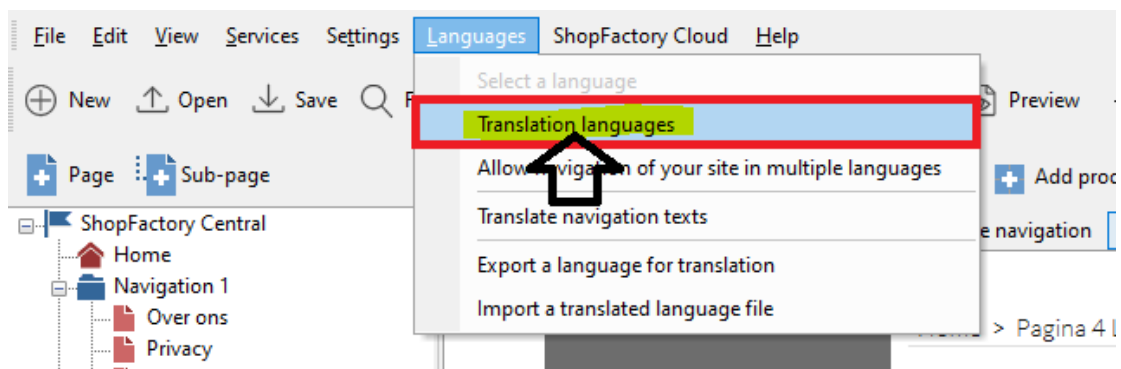

2) If this button is set to ON, all items which have not been translated into another language, will have the default language copied across.

So if you are translating an English website into Dutch for example, and you have not translated some paragraphs, then these paragraphs will display the English text (if that is the shop's primary language).

3) Click *Languages* menu -> **Translation languages** -> enable the language you want -> click OK

Follow the steps below to translate your pages and products:

- Open shop in ShopFactory
- Click LANGUAGES menu
- Select "**Translation languages**" and tick all the languages you want to enable in your shop.

- From the language toolbar, you also need to enable "*Copy Base Language Value*". A border around it indicates it is ON.

If this button is set to *ON*, all items which have not been translated into another language, will have the texts in default language copied across.

4) Then translate your pages and products.

Translating a page or product

- Select the page at the left tree menu
- Click *Translate Content* button on the Language Link toolbar
- Select the language to translate from the dropdown menu at the right-hand side
- At the right column, click *Translate* button

The screenshot shows the 'Home Page Translations' section. At the top, there are tabs: 'View Page', 'Manage Products', 'Edit page', and 'Edit product'. Below these are sub-tabs: 'Translate content', 'Translate website', 'Translate navigation', and 'Copy base language value'. The main table has two columns: 'English US' and 'German'. The first row is 'Home Page' with the German translation 'Willkommen'. The subsequent rows are 'Test Product 1' through 'Test Product 4'. Each row has a 'Visible' checkbox. A red box highlights the 'Translate' button for the 'Home Page' row, with an arrow pointing to it and the text 'Translate a page'. Another red box highlights the 'Translate' button for the 'Test Product 2' row, with an arrow pointing to it and the text 'Translate a product'.

- At the Page **description/custom html contents/Custom website contents** section, select **Edit** button on the right column

The screenshot shows the 'Home Page' translation interface. At the top, there are tabs: 'View Page', 'Manage Products', 'Edit page', and 'Edit product'. Below these are sub-tabs: 'Translate content', 'Translate website', 'Translate navigation', and 'Copy base language value'. The main table has two columns: 'English US' and 'German'. The first row is 'Description Custom Contents Custom Website contents'. The German column shows a translated welcome message. A red box highlights the 'Edit' button in the right column, with an arrow pointing to it and the text 'Click "Edit" button to translate the Page description / footnote / Custom HTML areas'.

Meta tags are used by some search engines to help categorize a website.
By entering these tags you may be able to improve your rating with these search engines.

- Title:** This is the title which will be shown in the top left corner of your browser and will be visible to your visitors. It should contain the most important two or three words your customers may search for when using a search engine. Try to keep it shorter than 62 characters or 6-8 words.
- Description:** This should be a short and readable description of your website. It should also
