Changing Currency Code for a specific country in ShopFactory

Merliza N. - 2022-04-05 - Miscellaneous Settings

If the official currency code in your country has changed, contact [ShopFactory Support](#) to have it changed in a future software release.

To change it immediately in your shop, follow the steps below:

An example used in this article is **NKr** currency code to **NOK**.

1. Open **Windows File Explorer**.

- You can do this by pressing **Win+E** on your keyboard to launch File Explorer immediately.

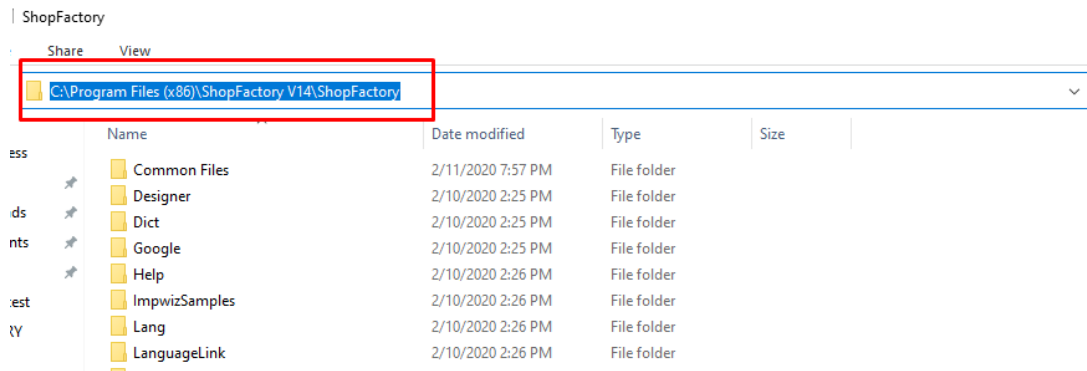

- Or you can use **Windows Search**

On the Windows Start screen type the words "*file explorer*" and, when the search results are displayed, press Enter on your keyboard or click or tap the File Explorer result.

2. At the "Address: " bar, enter:

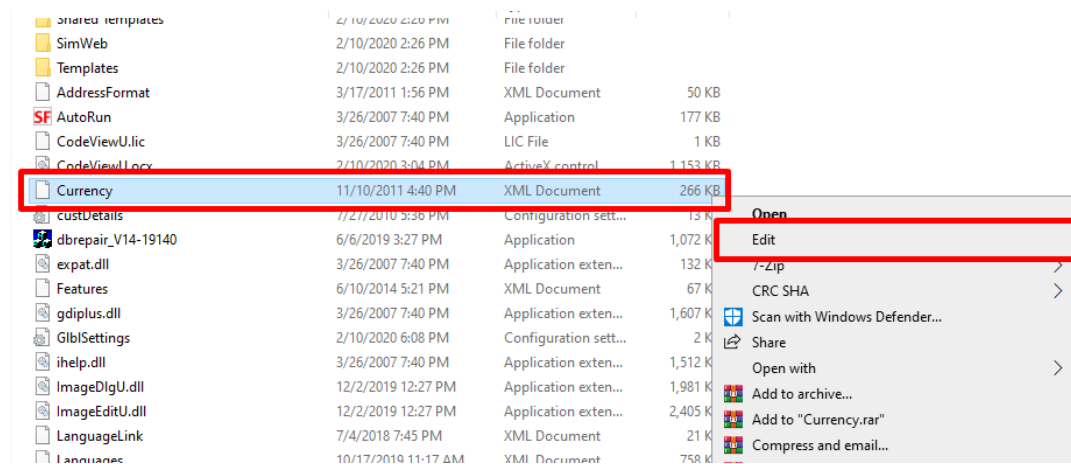

C:\Program Files (x86)\ShopFactory V14\ShopFactory

3. Press Enter Key on your keyboard.

4. Locate the file called "**Currency.xml**" file.

5. Right-click on the **Currency.xml** file and from the shortcut menu, select '**Edit**'.

6. The Currency.xml file will open in **Notepad** as plain text.

7. Click inside the text area in Notepad and then press **CTRL+Home** simultaneously so you are able to start from the top-most part of the text.

- Click 'Edit' menu » select 'Replace'

As an example, we are changing **NKr** to **NOK**.

- You will see the 'Find and Replace' dialog box, type **NKr** in the Find what: box

- Type **NOK** within the Replace with: box.

- Click 'Find Next' button and it will highlight NKR.
 - Click 'Replace' button to replace it.
 - Continue clicking 'Find Next' button and 'Replace' (you will do this approximately 14 times)
 - Click Save
8. Open your shop in ShopFactory.
 9. Enable 'Rebuild All' by selecting **Settings** menu
 10. Save and Preview your shop in Chrome or MS Edge external browser.
 11. Publish your shop again.
