EN-Selecting a new website theme or switching to a new template

Elenor A. - 2021-09-06 - Design and Customizations

Before changing to a newer theme, we recommend to always save a backup copy of your shop first in case you need to undo things or move a step back. To Save a backup copy of your shop, open your shop in ShopFactory and then click File -> Save AS -> enter shop-name_<date> and then save. Save the backup copy of your shop to a safe place either to an external storage device or thumb drive.

- Open your shop in ShopFactory
- Click Designer -> Select website theme
- You can select your preferred template such as HOM-AA

Important: At the lower right corner, untick "Include Sample Data"

- Click SELECT button

- SFEditor prompt message appears, click Yes

- Your old template will now be replaced with the V14 SFX theme

<u>1. Change Design Image</u>

- Click Designer -> Customize Design
- Click over the header part -> Design Image 1 -> Add image

- Click Image icon

	Design image		×]
		Restore original		
		Tile		
_		Yes	\sim	-
		Horizontal alignment		
_		center	\sim	_
		Vertical alignment		t F
		top	\sim	
		File size: Current width: Current height: Original width: 1920 Original height: 103		
-	Apply to:			
	 all pages pages using style SFX-Home_1 this page only 			
	OK Cancel			

- Select the image that you want to use, click Open
