

## Translate "Website Footer" texts in other languages

Merliza N. - 2022-03-24 - Add-ons and Backend Systems

**Language Link** add-on is included in ShopFactory Gold and Platinum plans. When you activate navigation of your site in multiple languages, you can translate the site elements and pages in other languages.

### Translating the Website Footer texts you have added at the bottom page:

*Note:* Website Footer background color can be changed in Customize Design interface but the footer Text colour can't be changed in Customize Design because it's using font tags. You can change the Footer text color using the formatting toolbar in (Language Link) Translate Contents/Website dialog. The HTML content has font tags that sets the color, which overrides the Customise Design colors.

- Open your shop in ShopFactory
- At the Language toolbar, click on "**Translate website**" button
- Locate the Website Footer section
- Translate the footer information on the right column, as shown in below screenshot:  
(Paste as text and change the text color using the formatting toolbar on the bottom.)

The screenshot shows the ShopFactory translation interface. The top navigation bar includes 'View Page', 'Edit page', 'Manage Products', and 'Add product'. Below this, there are tabs for 'Translate content', 'Translate website', 'Translate navigation', and 'Copy base language value'. The main content area is a table with two columns: 'English US' and 'Dutch'. The 'Website footer' row is highlighted, and the Dutch text is highlighted in red. The Dutch text reads: 'Breng je shop tot leven met ShopFactory. ShopFactory is de makkelijkste manier om uw winkel te creëren. © Copyright 1995-2022 3D3.COM Pty Ltd, makers of ShopFactory. All rights reserved.' A red arrow points to the formatting toolbar at the bottom, which includes options for text color, font size, and bold/italic formatting.

- Click the "**Translate website**" button again to go back to Normal editing mode.
- Save and preview your shop in MS Edge/Google Chrome external browser.

- Publish your shop again.
