How to setup tax rate using the ratio of the part of the product?

Elenor A. - 2021-07-06 - Envio, Taxes (VAT)

Generally, the tax in ShopFactory is applied to the whole product, not on just a part of it. However, you can set it up by adjusting the tax rate using the ratio of the part of the product.

For example:

What it should be:

$$\text{For the tax 19\%} = 45 / 119 * 19 = 7.18$$

$$\text{For the tax 6\%} = 60 / 106 * 6 = 3.40$$

ShopFactory set up:

$$\text{Tax rate of Tax 19\% should be set to } (19 * 45/105) = 8.14$$

$$\text{Tax rate of Tax 6\% should be set to } (6 * 60/105) = 3.43$$

$$\text{For the tax 19\%} = 105 / 119 * 8.14 = 7.18$$

$$\text{For the tax 6\%} = 105 / 106 * 3.43 = 3.40$$

Therefore, you should create 2 new taxes with tax rates of 8.14% and 3.43%, and assign them to the product.
