How do I accept payments using First Data Global Gateway e4 Hosted Payment page?

Merliza N. - 2021-12-08 - [Parámetros de pagamiento](#)

To setup First Data Global Gateway e4 payment method, load your website in Shop Factory Editor and follow these steps:

1. Click on the **"Central dropdown"** (formerly *"Properties"* button).
2. Select **"Payment methods accepted"** on the drop-down menu.
3. Ensure that the **"Country"** dropdown menu has **"Show All"** selected.

Payment methods accepted

Payment methods wizard
Here you can define the payment methods you want to accept. You can accept payment methods yourself or use a third party payment service provider which verifies payments on your behalf.
The base currency of your account is set to: Australian Dollar

[Signup / Activate Stripe for ShopFactory](#)

Payment processing:
☒ **I want to approve some payment methods myself**
Many businesses approve payment methods such as 'Pay by check' or 'Pick up and pay' or 'Pay on Invoice' themselves.

☐ **I want to use a payment service provider**
The partner companies listed below can approve payments made to you. You must have an account with them.

Country
Show all

Select	Service Providers
<input type="checkbox"/>	Stripe for ShopFactory
<input checked="" type="checkbox"/>	PayPal
<input checked="" type="checkbox"/>	PayPal Express
<input type="checkbox"/>	PayPal Pro
<input type="checkbox"/>	Moneybookers (Skrill)
<input type="checkbox"/>	2Checkout v2
<input checked="" type="checkbox"/>	AfterPay AU
<input type="checkbox"/>	ANZ eGate
<input type="checkbox"/>	ANZ eGate Direct

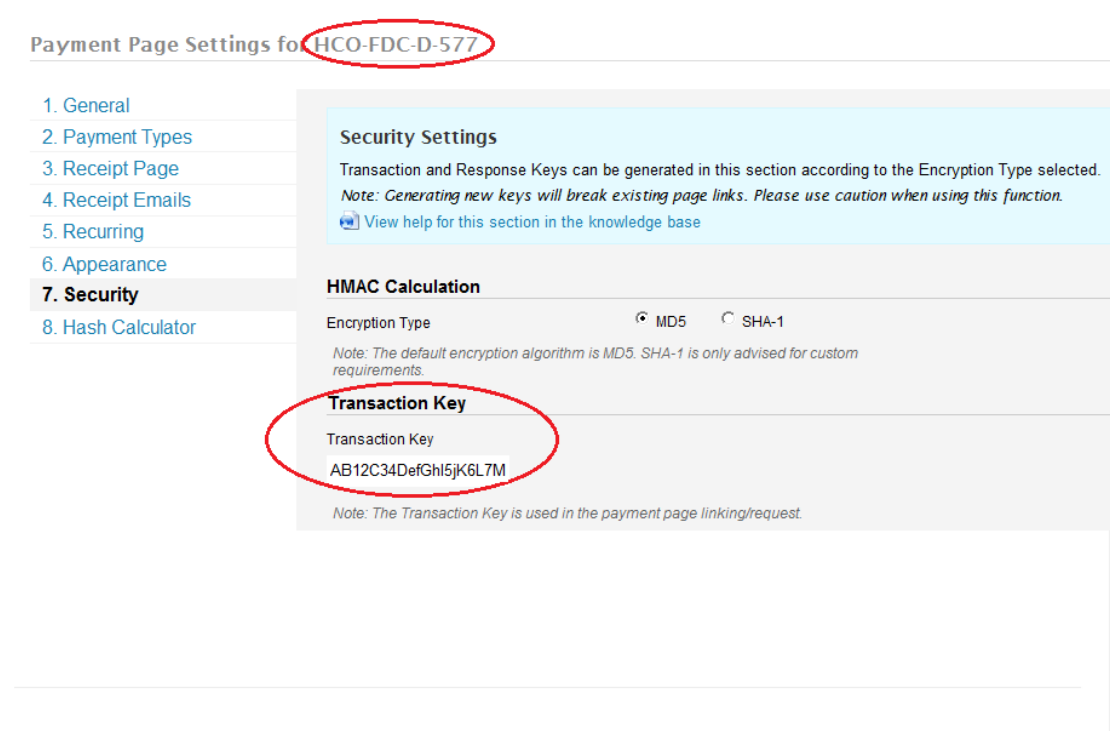

4. Scroll down to the **"First Data Global Gateway e4"** or **"First Data Global Gateway e4 API"** entry and check the box next to it.

5. Click "Next"

6. In a separate window, log into your Global Gateway e4 Real-time Payment Manager Account to retrieve your Merchant details: Payment Page ID and Transaction Key. For **e4 API**, you will need the Gateway ID, Password, Key ID, and HMAC Key from the FirstData terminal. Please carefully copy these details as any trailing space will cause an issue. More importantly, please ensure that the **"Request Content Type"** is set to **JSON** (and not SOAP) - click update to save.

- Select the "Payment Pages" tab. If you have already created a Payment Page, copy your **Payment Page ID** and paste into the **"Username"** Field in ShopFactory. You can find your Payment Page ID in the first column of the grey table or when you open the page you'll find it at the top next to "Payment Page Settings" (HCO-FDC-D-577 in the screen shot below).
- Next choose the Payment Page's **Security Tab** and copy the **Transaction Key**. Paste the Transaction Key in to the **"Transaction Key"** field in ShopFactory as seen below.

7. Go back to your ShopFactory-payment methods accepted editor

8. Enter your **"First Data Global Gateway e4"** or **"First Data Global Gateway e4 API"** Account details.
