

How to enable Specials page in ShopFactory

Elenor A. - 2021-12-27 - Páginas y productos

The **Specials** page is now available in ShopFactory V9 Gold and later upgrades, i.e. V10. If you have setup product specials, it will be listed on this page. The content of this page will only appear once your shop is published online.

IMPORTANT: You need to enable your PHP search and your server must support PHP to use this. Please contact your Hosting provider and verify that PHP is enabled in your hosting account.

Please follow this procedure to enable Specials page in your shop:

1. Open your shop in ShopFactory
2. In your shop, setup product discount to some of your products (Right click on the product or double click on the product then click Properties , select DISCOUNTS from the left menu to setup your product discount)
3. Once you have enabled Product discount to some of your products, right click on the Specials page
4. Select Page Properties and tick "**Visible**" checkbox

SF Page Properties Wizard - Specials

Products on Special.
Please select the display style below for your specials. All product specials will be automatically listed on this page, once you have published your website.
Note: PHP Search is required to be enabled and PHP must be supported on your server.

Title: Page ID: D-20 specials.html

OK Cancel Help

5. Select the layout of the page
6. Click Publish -> Publish on the Net
7. Click **Setup**
8. Enter your hosting details and make sure to tick "**Use PHP Search**"

The screenshot shows a 'Setup' wizard window with a close button (X) in the top right corner. The window contains the following elements:

- Introduction:** A message stating, 'This Wizard allows you to quickly publish your Website to the Internet or to your own Computer. Just select the option you require, fill in the details required and then click on the NEXT button.' accompanied by a small icon of a globe and a computer.
- Options:** Two radio buttons are present: 'Internet' (selected) and 'My Computer'.
- Advanced Settings:** A checkbox labeled 'Show advanced settings' is checked. Below it, several options are listed with checkboxes:
 - Use PHP search:** This checkbox is checked and is highlighted with a red rectangular box.
 - Automatic PHP detection:** This checkbox is checked.
 - Passive:** This checkbox is checked.
- Fields:** Several text input fields are present, some of which are redacted with black bars:
 - User Name:** A text field with a redacted value.
 - Password:** A text field with masked characters (dots).
 - Remote Host:** A text field containing 'webhost.shopfactory.com'.
 - Publish URL:** A text field with a redacted value.
 - Base Directory:** A text field with a redacted value and a 'Browse...' button next to it.
 - Timeout:** A text field containing '-1'.
 - Rename Website home page to:** A dropdown menu showing 'index.html'.
- Protocol and Encryption:** Two dropdown menus at the bottom left. The 'Protocol' dropdown is set to 'FTP - File Transfer Protocol', and the 'Encryption' dropdown is set to 'Require explicit FTP over TLS'.
- Buttons:** At the bottom of the window are three buttons: 'OK' (highlighted with a blue border), 'Cancel', and 'Help'.

9. Click OK and publish the shop
