The emails you can set-up as you wish, to inform people in your organization.

The positive and negative responses need to be setup to be the exact files of your shop.

e.g.

URL server to server: https://www.globecharge.com/webshop/gestpay\_basic.cgi

Shop name is your Shop URL (your actual domain name)

e.g.

http://www.chocolate.santu.com/V6BSBasicSF/

In the example below, the shop language is English – US (en-us)

If your shop language is Italian then your language in the URL is set as "it"

So for the Positive response the URL is

http://www.chocolate.santu.com/V6BSBasicSF/contents/en-us/V6Yes.html

(URL format should be http://mydomain.it/contents/<language>/V6Yes.html)

For the negative response the URL is

http://www.chocolate.santu.com/V6BSBasicSF/contents/en-us/V6No.html

(URL format should be http://mydomain.it/contents/<language>/V6No.html)
