Update the number of products displayed per page

Merliza N. - 2021-03-09 - Páginas y productos

I am using a grid productloop style that shows 4 products/paragraphs per row. I want to show the last row with 4 products across.

I want to show more products on the first page on a department, where do I change this setting?

How can I define the number of products to be displayed per page?

You can change the **Split Pages** setting by going to **Settings** menu -> **Global Settings** -> **Settings for this website** -> **MISCELLANEOUS**

- Locate the “**Autosplit page if it contains more products/paragraphs than:**”
- As an example, change the value to 40 so that will show 4 products/paragraphs per row (10 rows before the page is split to Page 2, Page 3, etc.) *Note: Do not enter a very high number in this setting as it will affect page loading speed i.e. 200 products per page will take time to load. Also, do not enter a negative value here.*

The screenshot shows the 'Global Settings' dialog box. On the left, a tree view shows 'Global Settings' expanded to 'Settings for this Website', which is further expanded to 'Miscellaneous'. A red arrow labeled '1.' points to the 'Miscellaneous' folder. In the main area, the 'Autosplit page if it contains more products/paragraphs than:' field is highlighted with a red box and contains the value '40'. A black arrow labeled '2.' points to this field. At the bottom, the 'OK' button is highlighted with a blue box and labeled '3.'. Other settings visible include 'Search On', 'Show Weight', 'Mail to a friend', 'Show Catalog Number', 'Favorites', 'Show Discount', 'Show Home link', 'Show Breadcrumbs', 'Don't allow buying', 'Customer must tick Terms', 'Add to Basket dialog', 'Automatic customer language detection', 'Allow buying related products', and 'Customer location detection'. There are also checkboxes for 'Show product details in Checkout', 'Customers who bought this item also bought', 'Apply product discounts to Options', and 'Product discounts: Free products are only granted once'. Input fields for 'Remember customer shopping basket for (days):' (7), 'Round currencies to the nearest:', and 'Specify weight in:' (kg) are also visible, along with a 'Delivery time' dropdown set to '5-7 Days'.

Enter the number of products/paragraphs you want to display on one page in the box (as pictured above). If you want this setting to apply to all websites you build with ShopFactory then you can also change it in *New Website* settings => Miscellaneous.

- Click OK
- Save and preview in external browser
- Publish your shop again.
