Current ShopFactory V14 Release

2022-05-11 - Merliza N. - [Current ShopFactory release](#)

ShopFactory V14.6.0 Build:23122

(Release Date: 05-05-2023)

[Click here to download the latest SF14 build](#)

This latest build improves/fixes the following:

SF-3026: English-Australia (en-au) language now supported in Language Link

SF-3019: Fix the filter-enabled departments (that was incorrectly including its productloop twice)

SF-2995: Fix PayPal Checkout Pay Later messaging where it wasn't updating with 'Options and Choices' prices

- Improve loading performance on department filter pages.

SF-3025: Fix for SFX-SHA_1 productloop style and *'Link Image To'* feature: Unable to navigate into linked page when clicked on. A grey overlay appears instead.

SF-3028: Fix *YouTube* videos crash in SF internal preview

SF-3029: Fix language *href* tags for SEO

SF-3031: Fix 'Doofinder Search app' Redirection feature

- change setting as suggested by Doofinder support

Update missing German translations

SF-2995: PayPal Checkout: Pay Later messaging doesn't update with Options and Choices prices

- Improve loading performance on department filter pages.

SF-3033: UTF-8 characters will sometimes not be found by PHPSearch.

SF-3034: Language Link - Fix access to PageFootnote in other languages if the main language PageFootnote is empty.

SF-3033: UTF-8 characters will sometimes not be found by PHPSearch.

1. Download and install the latest release: ShopFactory V14

2. Open your shop in ShopFactory.

3. *Optional*: Enable '*Rebuild all*' from 'Settings' menu then click on 'Preview' -> Preview in external browser. Go back to the ShopFactory editor and untick 'Rebuild all' from the *Settings* menu

4. Save and preview your shop in external browser. Place a test order to ensure secure checkout works.

5. Publish your shop again.
