Calculate Shipping Charges with "Apply per box" setting

Merliza N. - 2022-05-25 - Shipping and Taxes

This article helps you setup shipping costs for individual product and if you are selling a bulky / heavy / oversize item that needs to be shipped in a separate parcel, then you can enable the "Apply per box" setting.

A. Setup shipping to individual product(s)

Refer to this KB article,

[How do I add shipping charges to individual products? - Knowledgebase / Shipping and Taxes - ShopFactory Help Center \(deskpro.com\)](#)

- Enter **Weight value** for the heavy / bulky item in EditProduct dialog.

The screenshot shows the 'EditProduct' dialog box. At the top, there are two checkboxes: 'Product visible' (checked) and 'Don't show 'Add to Basket' button' (unchecked). Below these are several input fields: 'Product title' (containing 'Bulky Test Product 40'), 'Price' (containing 'A\$ 125.00'), 'Promote' (a dropdown menu), 'SKU / Cat. No.' (containing 'test-pr40'), and 'Weight' (containing '20.000' and 'kg'). The 'Weight' field is highlighted with a red rectangular box, and the value '20.000' is highlighted in yellow.

B. If your heavy/bulky item needs to be sent as a separate parcel, you can also use "**Apply per box**" setting in the shipping charges dialog

- Open your shop in ShopFactory
- Click **Central** dropdown -> Shipping Charges
- Click Next and then select the shipping method
- Tick "**Apply per box**" and enter the maximum weight for that heavy / oversize item i.e. 20kg/lbs

Shipping Charges

Here you enter the costs you charge for the shipping methods you offer.

In the 'Select a region' Window select a region belonging to a shipping method.

If you cannot see the regions you have set up for a shipping method, click on the **+** next to the name of the shipping method.

All charges you enter for any shipping method will now only apply to customers living in the region you have selected.
