How can I set a Minimum purchase amount for my Shop? Customers have to Purchase more than \$20 for example

Merliza N. - 2021-12-08 - [Pages and Products](#)

You can setup minimum and maximum Total Order values in Global Settings

- Open shop in Shopfactory
- Click Settings menu and select Global Settings
- In the Section marked Set Purchase Price - Minimum and Maximum, specify the Minimum order amount you will accept. If you don't want to set a Maximum enter a large number such as 999999. Then Click the Ok button.

The screenshot shows the 'Global Settings' window. On the left is a tree view with 'Global Settings' expanded, showing 'New Website' (Shopping Basket, Miscellaneous, Images) and 'Settings for this Website' (Shopping Basket, Miscellaneous, Images). The 'Shopping Basket' under 'Settings for this Website' is selected. The main area shows the 'Set purchase price' section highlighted with a red box. It contains two input fields: 'Minimum' with the value 'A\$ 20.00' and 'Maximum' with the value 'A\$ 999,999.00'. Above this is the 'Order format' section with a dropdown set to 'HTML_V8', a 'Set delimiter for order attachment' dropdown set to '~', and a checked 'Attach order as file' checkbox. Below the red box is the 'Affiliate Reseller ID' section with a 'Sign up as Affiliate Reseller' button and an empty input field. At the bottom is a checkbox for 'Show payment gateway in new window'. The window has 'OK', 'Cancel', and 'Help' buttons at the bottom right.

If I set minimum as \$20 and Maximum as \$999999 and I try to order \$5.00 the following will occur at checkout
