## How to Populate "Shop by Brand" page and how to turn it off?

Elenor A. - 2021-12-27 - [Pages and Products](#)

**Shop by Brand** is a special page supported in ShopFactory 9/10 Gold product which will allow your customers to shop by manufacturer or by brand.

Please note that your Hosting account must have PHP enabled for this function to work properly.

**To populate this page, please follow this procedure:**

- Open your shop in ShopFactory
- Add your products, click Properties
- Assign a manufacturer name for each group of product
- Enter name of brand in Brand/Manufacturer field

**\*\*\* Do this for all other products in your shop.**

- Click Ok
- Publish your shop.

**NOTE:** Your Host/server must support PHP for this feature to work - the brands will be auto-populated once the shop is uploaded online. Local and internal preview will not show the brands as it requires PHP so the shop must be uploaded to the server first.

**If you don't want to use this feature, you can turn it OFF by setting the page to "Invisible".**

- Open shop in ShopFactory
- Right click on Shop by Brand department
- Click Page Properties

- Untick the Visible checkbox

**SF** Page Properties Wizard - Shop by Brand

**Shop for products by brand.**

Please select the display style below for your products. Products listed on this page must have a brand/manufacturer defined. All brands assigned to products will be listed below. You can also associate an image with each brand listed below.

Note: PHP Search is required to be enabled and PHP must be supported on your server.

Title: Shop by Brand
