

How to setup Doofinder search app

Merliza N. - 2021-12-08 - Apps & ShopFactory Cloud

Doofinder Search app

A powerful, quick and intuitive search engine that will help you to improve your online store's sales.

You lose lots of sales because your users cannot find what they are looking for, even though it is there. Doofinder will show relevant results with a few keystrokes, as well as this, it will learn from your user's searches and improve the buying process.

Just click [here to sign up for a free Doofinder account](#) and then activate the Doofinder app.

1. In ShopFactory Central, click the **App Store** button / Complete a purchase of the Doofinder app / Click the **Activate Apps** button in ShopFactory Central.
2. Sign up for a Doofinder account at https://doofinder.com?fp_ref=shopfactory. Set up your Profile. Click Save.

c. For the Data Source, click "Skip, I'll do it later".

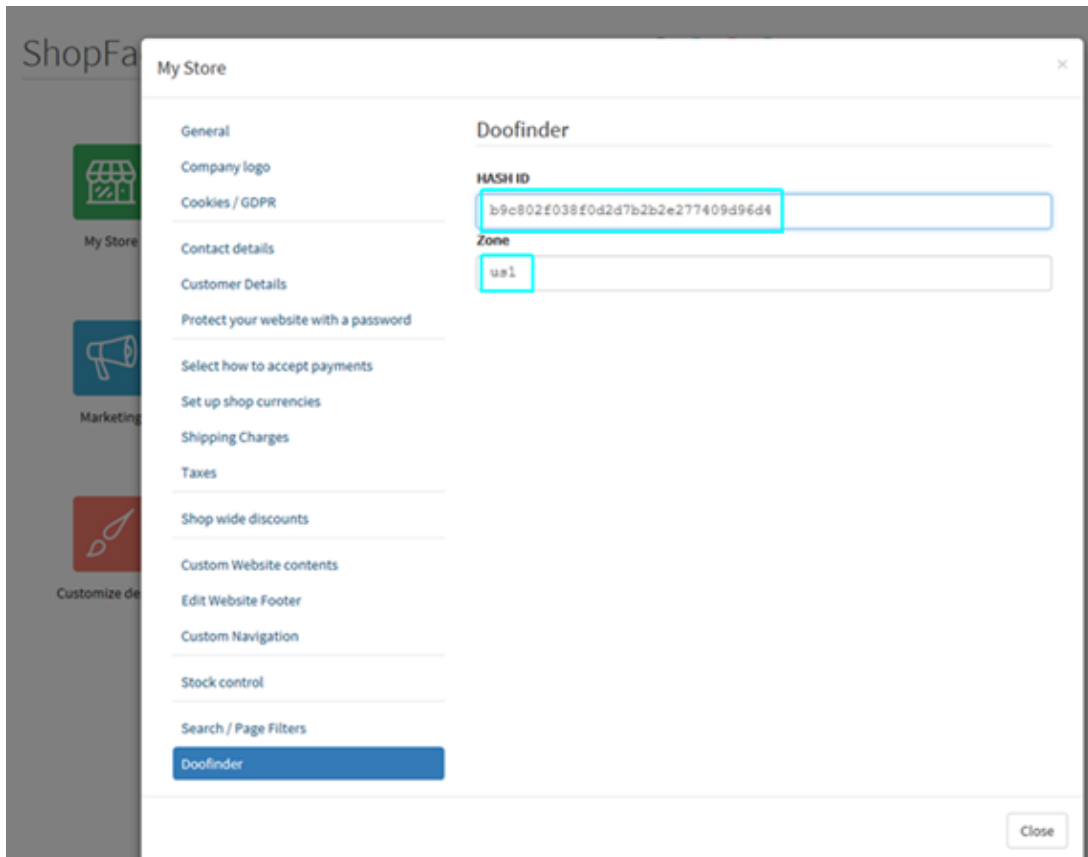

d. For "Get the Script", click "Skip this step and finish".

e. In the next step you will also need your Zone. Go to "Other Integrations"/IFrame. Get the zone from there as highlighted in the image below. It should be us1 or eu1.

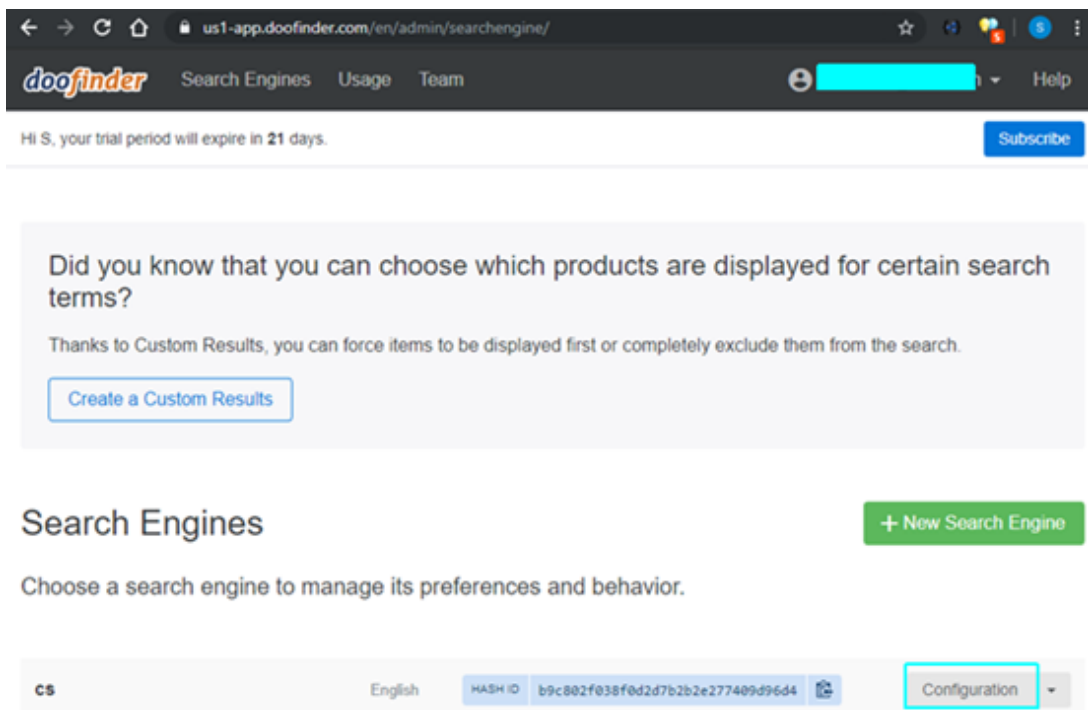

4. As copied to the clipboard into the box provided. Type in the letters and number before the "-" from the IFrame, into the Zone box provided.

5. Publish shop, with the “Regenerate search files” checkbox ticked.

6. In Doofinder, click Configuration.

7. Enter the address of the search-doofinder.csv file into the box provided. For example, if your shop address is <http://mysite.shopfactory.com/>, the address of the data source will be <http://mysite.shopfactory.com/contents/search-doofinder.csv>.

Click **Save Changes** button.

Click **Process Now** to update your Doofinder search file.

Index at specific times

[Process Now](#)

8. Your shop should now have Doofinder search integrated. Navigate to your shop in a browser and try searching.

9. (Optional) If you want selectable filters displayed with the search results, you will need to set up Facets in Doofinder. For example:

- Data Sources
- Facets**
- Suggestions
- Excluded Results
- Security
- Doofinder Layer
- Other Integrations
- Basic Settings
- Advanced Settings

Facets

Facets feature lets you filter search by certain fields. If you make a facet visible it will be displayed in the search results. Facets also enable filters for [Custom Results](#). You can sort facets by dragging and dropping them into the desired position. [Learn more](#).

FIELD LABEL

Choose a field... label visible [+ Add](#)

Field	Label	Visible	Terms
price	Price	<input checked="" type="checkbox"/>	
brand	Brand	<input checked="" type="checkbox"/>	5
categories	Categories	<input checked="" type="checkbox"/>	8

[Save](#)

10. If you have added new products and/or edited your existing products, you will need to reprocess your Doofinder search file (csv) to ensure the search file is up to date. (In ShopFactory, your shop must've also been published with "Regenerate Search Files" option ticked.

- Go to "Data Sources" and click on "Process Now".

Here's an example of Doofinder search results page

The screenshot shows a search results page for 'reiki' on a music store. The page features a navigation bar with categories like 'Home', 'Nieuwe Releases', and 'Aanbiedingen'. A sidebar on the left includes a price filter (€5.99 to €21.99) and a list of artists with their respective result counts. The main content area displays a grid of 14 album covers, each with its title, artist name, and price. The albums include 'REIKI GOLD 2' by Llewellyn, 'REIKI MUSIC' by Ajad, 'REIKI HARMONY' by Terry Oldfield, and 'REIKI HEALING WAVES' by Parijat.
